

OPERATING PROCEDURE

1. Be sure ON/OFF switch is in OFF position.
2. Plug the line cord into the electric outlet making sure it is the same as that indicated on the nameplate.
3. Turn ON/OFF switch to ON position.
4. Check the degree of vacuum by pinching the regulating valve gauge. To increase vacuum, turn the gauge clockwise. To decrease vacuum, turn the gauge counter-clockwise.
5. Be sure to empty the vacuum bottle when convenient.
